

The Success Story

More than 20 years ago, Dr. Alfred and Ria Klabuschnigg founded the Institute for Alternative Health Consulting. Dr. Alfred Klabuschnigg is a certified General Practitioner, Pediatrician and Holistic Practitioner and his wife is a Nutrition and Health Consultant.

Originally the institute conducted alternative diagnostic methods and alternative therapies that included: Brain Scanning, O2-Ion-Therapy, Magnetic Field Therapy and Colon- Hydro-Therapy, as well as Bioresonance, all of which are successfully applied today.

As a result of the achievements it became obvious that Bioresonance is a helpful method to support weight loss programs.

Ria Klabuschnigg developed the "AMB®-Method", which is currently utilised successfully in more than 30 institutes in Austria, Germany and in Iraq.

The AMB®-Method

Eliminating food blockages enables weight loss.

Energetic blockages have different effects on the human organism. A new finding is that certain foods can slow down a person's weight loss or it can even make it impossible.

These food types can be detected and the respective wrong nutritional information erased through a temporary suspension using the AMB®-Therapy.

With the AMB®-Method all food types are tested individually. An individual diet recommendation accompanies the test and together with the AMB®-Bioresonance therapy leads to successful and stable weight loss.

Successful Weight Loss

Test

- Using the AMB®-Bioresonance device Food and Dietary Supplements are tested by measuring skin resistance. This process is absolutely pain free.

Therapy (every 2 to 4 weeks)

- Food blockages will be resolved
- A broad level of tolerance for the respective stressors will be built
- Wrong nutritional information will be erased through the therapy
- Stress free weight loss is possible
- Food craving attacks will be eliminated
- Withdrawal symptoms will be counter balanced by the AMB®-Therapy

Consulting

- Based on the individual requirements and the latest scientific findings an appropriate diet recommendation is developed. (gender, age, activity...)
- Taking the clients lifestyle into consideration the daily calorie requirements are calculated.
- The individual diet recommendation balances fat, protein, carbohydrates, vitamins, minerals and vital nutrients.

The AMB®-Bioresonance Device - The Difference

The Bioresonance device used for the AMB®-Method is equipped with specially designed AMB®-weight loss software programs. These unique and highly effective programs have been patented and are exclusively used in AMB®-Institutes.

Other possible applications of Bioresonance

- AMB®-MED treatment of pollen allergy, animal hair and dust mite allergy, migraine, intestine problems, skin rashes, etc.
- AMB® raises the bodies defences to prevent diseases and helps with exhaustion, listlessness and fatigue
- RMB-smoke free with bioresonance reduces withdrawal symptoms and improves your quality of life
